Summary

Computer Science undergraduate with hands-on experience in full-stack web development and application security. Skilled in building production-grade web applications with Python/Django and JavaScript, along with a strong focus on secure coding, vulnerability assessment, and penetration testing. Proven ability to design, develop, and test software while identifying and mitigating security risks.

Education

Silicon Institute Of Technology
Bachelor of Technology in Computer Science

2023 – 2027
CGPA: 7.5

Experience

Secure Space

Jun 2026 – Jul 2026

Software Developer Intern

Remote

- Contributing to the design, development, and security hardening of in-house software, focusing on secure coding practices and vulnerability identification.
- Conducting functional and security testing on company software, performing bug identification, vulnerability assessment, and risk mitigation.
- Strengthening application security posture by identifying flaws, testing for vulnerabilities, and implementing fixes and best practices.

Tata Motors

Jun 2025 – Jul 2025

Web Developer Intern

On Site

- Engineered a full-stack e-commerce web application using Python, Django, HTML/CSS/JavaScript, and XAMPP (Apache, MySQL, PHP), implementing product catalog management, user authentication, and shopping cart functionality.
- Managed and monitored internal security software/systems, safeguarding company data and web application integrity through vulnerability checks and access control best practices.

Projects

Expenso – Smart Expense Tracker | *React.js, Node.js, Express.js, MongoDB, JWT*

- Built a full-stack expense tracking web application using React.js and Node.js, implementing RESTful APIs for CRUD operations with a responsive, component-based frontend.
- Designed a MongoDB schema for transactions, categories, and profiles, integrating JWT-based authentication and role-based route protection.
- Developed interactive data visualizations and analytics dashboards for income vs. expense trends, improving user financial insight.

DPI Engine | *C++, TCP/IP, TLS/SSL, PCAP, Wireshark*

- Built a multi-threaded DPI engine in C++17 parsing Ethernet/IP/TCP/UDP from PCAP files with 5-tuple flow tracking.
- Designed a load-balancer/fast-path pipeline using consistent hashing and mutexes for thread-safe parallel packet processing.
- Implemented TLS SNI extraction from Client Hello packets to classify encrypted traffic and enforce domain-based flow blocking rules.

Technical Skills

Languages: Python, JavaScript (ES6+), C++, HTML/CSS, SQL

Technologies: Django, React.js, Node.js, Express.js, MongoDB, MySQL, XAMPP, PHP, REST APIs, JWT Authentication

Security & Networking: Vulnerability Assessment, Penetration Testing, Risk Mitigation, TCP/IP, TLS/SSL, Wireshark, PCAP Analysis

Concepts: Data Structures & Algorithms, Operating Systems, System Design, OOPS

Certificates

- Introduction To Cyber Security – Cisco
- UX Designing – Coursera
- Full Stack Web Development Bootcamp – Udemy
